## Villa

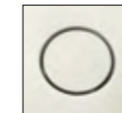

### Basins

The Villa family has 5 styles of basin. The 430 round and 550 oval basins are designed to be bench mounted, while the 380 round and 485 oval basins are designed to be semi-inset. The 600 basin with shelf can be installed with the shelf on the right or left hand side. Each basin is supplied with a waste with matching solid surface plug. All Villa basins come in 2 organic finishes.

### Bath

The generous proportions of the Villa freestanding bath provide a relaxing and sumptuous bathing experience. The organic finishes and elegant profile will make any bathroom feel like a five star luxury resort. Villa baths have an overflow for peace of mind and are supplied with a matching solid surface pop-up plug and waste. The Villa freestanding bath comes in 2 sizes 1500mm and 1725mm, in 2 organic finishes.

## Neo

### Basins

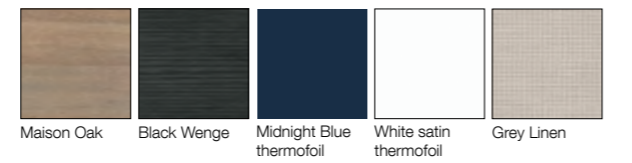

The selection of clean modern Neo basins offers flexible dimension options and configurations to suit small powder rooms through to large family bathrooms. Neo basins feature overflows and can be wall mounted, or partnered with cabinetry. Created in solid surface white and available with Softskin options, the Neo basins can be ordered with or without a tap hole and are supplied with a polished chrome pop up plug and waste and wall basin fixings bolts. Solid surface white waste cap sold separately.

### Furniture

Neo cabinets are available in a range of sizes to suit the Neo basins. Sleek drawers with soft close mechanisms are partnered with an internal adjustable shelf (excluding slimline) offering ample storage with clean and uncomplicated appearance.

Linea 1180 single Washplane®  
in white solid surface

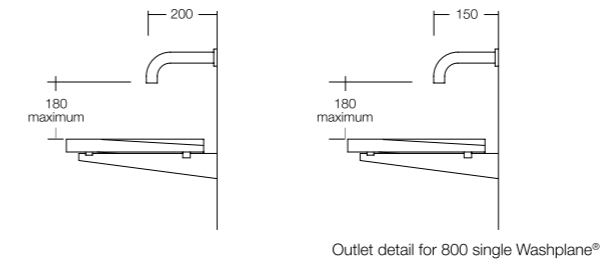

Linea 1600 double Washplane®  
in white solid surface

## Washplane®

The Omvivo Washplane® is one of the most luxurious bathroom fittings available and is designed to simplify, yet enhance the bathroom experience.

The Washplane® is supplied with hardware and drainage system which is installed into a cavity wall. A 150mm wall outlet for a single 800mm Washplane® and a 200mm wall outlet for all others are recommended. Outlets that have a cascade style aerator, a 5-7 liters per minute capacity and water falling at 90 degree angle directly onto the Washplane® top should be used. Each Washplane® is designed and manufactured in Australia to superior standards.

### Geo Washplane®

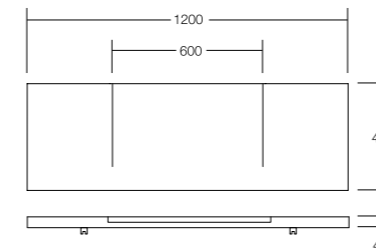

The generous structure and sharp line of the Geo Washplane® offers strong uncomplicated design. Custom sizes and colour options are available.

## SOLID SURFACE

Omvivo basins are produced from solid surface with a matt finish.

Solid surface is produced from a blend of resins including acrylic and around 65% natural minerals. This produces a high quality solid surface product that is homogenous, meaning the basin is the same material throughout, there is no inferior coating or cheaper structure under the white finish.

Scratches, stubborn stains and even small chips can be buffed out, providing a product that will look great for years to come.

The products are easy to care for with simple cleaning instructions. Each basin is supplied with a care kit to assist in maintenance.

Each Omvivo basin is produced and finished by hand, ensuring consistent quality and a smooth matt surface.

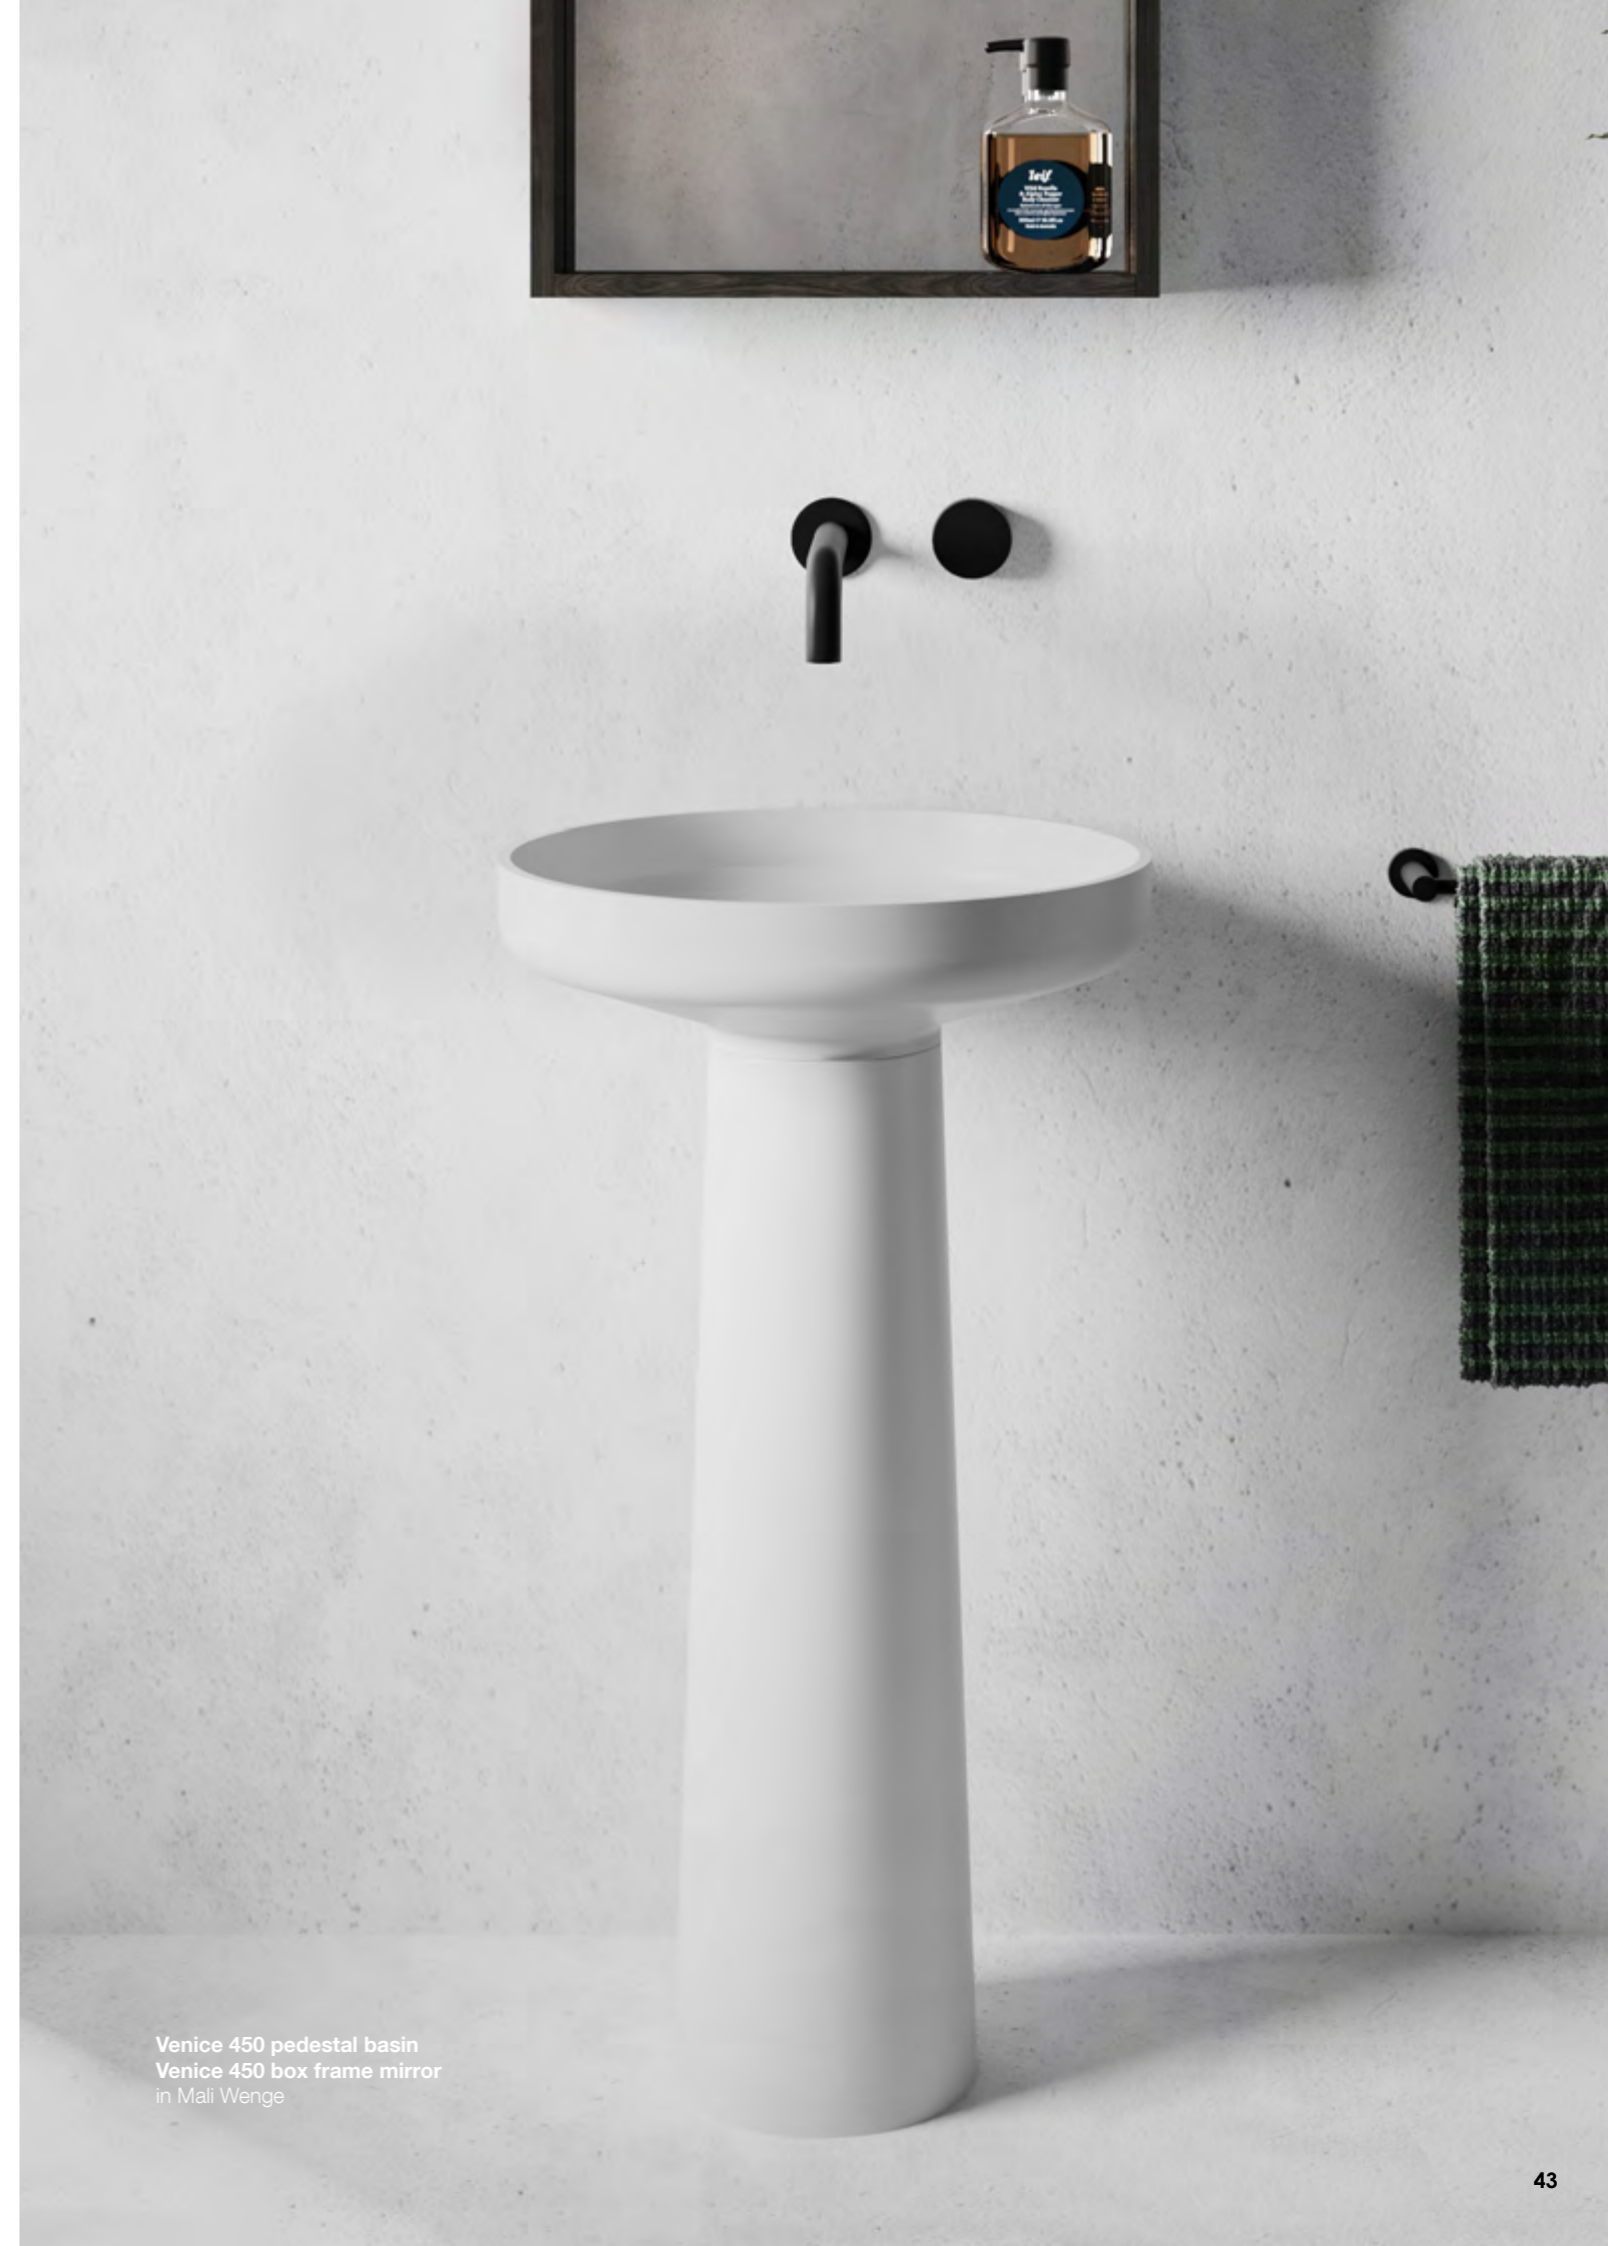

## CHOOSING OMVIVO SOLID SURFACE

As designers, makers and socially responsible members of the community, Omvivo is continuously exploring new opportunities and implementing new processes with regards to our sustainability practises.

We operate with design and production principles that ensure we always consider and plan for the full lifecycle of the products we create. We are especially focused on creating products that are functional, durable, and timeless in their appearance. This ensures that our product reach their maximum life span and demonstrate longevity in both materials and styling.

Our solid surface products are created using materials and processes that require a low amount of energy input at all stages of production. By doing this we are able to create products that have a low amount of embodied energy. When combined with the long life span of the products, this greatly reduces the environmental impact.

When quality solid surface products like Omvivo's eventually reach the end of their usable life they can be recycled, with the materials put back into the production process, unlike ceramic goods. This is done by rejuvenating the surface of the product, or breaking down the solid surface materials into chips and powder where it can be reformulated for use in new products.
